KLM Royal Dutch Airlines, Schiphol

Senior frontend developer

Feb 2017 – June 2019

Real time fault tolerant mobile application used by 330 KLM mechanics at Schiphol airport to perform between-the-flight aircraft maintenance. The application displays up-to-date KLM's fleet schedule and towing information, helps team leaders to manage teams, and provides the scope of work for mechanics.

Responsibilities:

- Incorporate business requirements into biweekly product increments

Achievements:

- Developed and launched product from the scratch
- Clean record of critical issues in 2018
- [Open source library](#) as a solution to common Ionic's problem. 450 weekly downloads in 2018

Career insights

2010 – 2012

Full stack freelancer (PHP, JS, SQL, Linux, CI/CD).

Successfully completed multiple small and middle-sized projects. Received [positive feedback](#) from all of my clients. Reviews are available [here](#). Must be registered user to read all the reviews. Sorry.

2005 – 2010

Junior/middle full-stack developer (PHP, JS, SQL, Linux).

Significant experience was acquired while working on [GameWatcher](#) and [RecordNerd.com](#).

2000 – 2003

Worked as visual designer for a local TV channel. Acquired passion for objects composition, color matching and animation.

Education

Masters degree in Computer Engineering. Sevastopol State Technical University [2002 – 2007]

Certifications

-  [AWS Certified Solutions Architect – Associate](#) - Jan 18, 2019
-  [Professional Scrum Master I](#) - Apr 2, 2018

-  React Nanodegree - Dec 27, 2017

Projects accomplished:

- <https://github.com/sneas/myreads> React
 - <https://github.com/sneas/readable> React Redux
 - <https://github.com/sneas/mobile-flashcards> React Native Redux
-  Zend Certified Engineer PHP 5.3 - Jan 24, 2011

Additional experience

- Most of my interests and hobbies revolve around GitHub and open source community.
