

Dmitry Snisarenko

Frontend Developer

Last update: Fri Nov 23 2018 19:53:00 GMT+0100 (CET)

The online version is available at <https://sneas.github.io/cv>

Biography

Residence

Weesp, Dichtershof, NL

LinkedIn

<https://www.linkedin.com/in/dmitry-s-74a4b830/>

Email

snisarenkodima@gmail.com

Languages

English, Russian, and a little bit of Dutch

Why I'm doing this

My goals and ambitions are to free up people from meaningless recurring work and help them to achieve their objectives with a minimal effort.

How I'm doing this

For users

By providing smooth user experience concerning physiology, psychology and data integrity principles

For developers

By automating development process with the help of continuous integration and continuous deployment systems

For developers

By helping to develop reasonable and flexible component-based architecture

For testers

By automating testing routines and including them into release cycle

For designers

By establishing and maintaining design systems and frontend component libraries

For the team

By initiating collaboration between team members and stakeholders on improving scrum/agile process within organisation

For myself

By challenging my own limitations and weaknesses

Career insights

Excited about computer programming, automation, typography, and design since 1996.

Visual and animation designer for the local TV channel between 2000 and 2003.

Started professional career as a fullstack LAMP developer in 2005.

Remote freelancer between 2010 and 2014. I received extremely positive feedback from all of my clients. You can read it [here \(https://www.upwork.com/o/profiles/users/_~01752134695731685e/\)](https://www.upwork.com/o/profiles/users/_~01752134695731685e/).

Pure frontender since 2012.

- <https://github.com/sneas/myreads> React
- <https://github.com/sneas/readable> React Redux
- <https://github.com/sneas/mobile-flashcards> React Native Redux
- Zend Certified Engineer PHP 5.3 - Jan 24, 2011

Additional experience

A complete list of side/hobby projects: <https://github.com/sneas>.

Some cool projects:

Component Library

<https://github.com/sneas/component-library>

The easiest way to create HTML component library for existing website.

ES6 NodeJS SASS

A solution to CORS problem of Ionic and WKWebView

<https://github.com/sneas/ionic-native-http-connection-backend>

This project's become quite popular since Ionic made WKWebView a default web container.

Angular 5 Typescript RxJS Cordova

Namespaced Bootstrap

<https://github.com/sneas/bootstrap-sass-namespace>

Non-conflicting bootstrap integration. Consider using this project if Bootstrap has to be applied partially. ie to particular div of a page.

Bootstrap SASS
