Professional Experience

KLM Royal Dutch Airlines, Schiphol

Senior frontend developer

Feb 2017 – present

Real time fault tolerant mobile application used by 330 KLM mechanics at Schiphol airport to perform between-the-flight aircraft maintenance. The application displays up-to-date KLM's fleet schedule and towing information, helps team leaders to manage teams, and provides the scope of work for mechanics.

Responsibilities:

- Incorporate business requirements into biweekly product increments

Achievements:

- Developed and launched product from the scratch
- Clean record of critical issues in 2018
- Open source library as a solution to common Ionic's problem. 450 weekly downloads in 2018

`Angular` `Ionic` `Redux` `RxJS` `Typescript` `SASS` `Webpack` `Jest`

Knab hypotheek, Amsterdam

Senior frontend developer

Jun 2014 – Feb 2017

Core front end developer of a fully automated mortgage advice system.

Started as a backend developer and eventually transferred to the frontend.

Responsibilities:

- Developed new functionality
- Conducted job interviews

Achievements:

- Developed flexible registration process and 16 tools intended to gather detailed customer's legal and financial data
- Component library as a result of collaboration with the design team
- Introduced test driven development process with Karma and test automation with Protractor

`AngularJS` `Karma` `Protractor` `SASS` `Gulp` `Bootstrap` `PHP` `Symfony` `MySQL` `PHPUnit` `AWS` `Heroku`

upwork.com, Mountain View, USA

Senior frontend developer

Oct 2012 – Jun 2014

Core frontend developer of the world's #1 freelance marketplace.

Responsibilities:

- Developed A/B tested functionality for company's crucial business component: Job Posting Engine
- Conducted job interviews
- Facilitated onboarding process

Achievements:

- Developed and successfully launched job post engine: highly-configured job posting and rendering tool
- Introduced test driven development process into the organization's development flow

Career insights

2010 – 2012
Full stack freelancer (PHP, JS, SQL, Linux, CI/CD).
Successfully completed multiple small and middle-sized projects. Received extremely positive feedback from all of my clients. The feedback is available [here (https://www.upwork.com/o/profiles/users/_~01752134695731685e/)](https://www.upwork.com/o/profiles/users/_~01752134695731685e/).

2005 – 2010
Junior/middle full-stack developer (PHP, JS, SQL, Linux).
Significant experience was acquired while working on GameWatcher and RecordNerd.com.

2000 – 2003
Worked as visual designer for a local TV channel. Acquired passion for objects composition, color matching and animation.
